CONTROL FOR ANY AMBITION

Danfoss Link wireless system

Danfoss Link can control both floor heating, heat recovery ventilation, heat-pumps or radiator thermostats in combined or stand-alone systems using the same controller. The controller has an intuitive touchscreen and access point for all your heating systems. An agile and flexible solution that is also ideal for retrofit projects.

Danfoss Link system

CF2+ wireless system

The Danfoss CF2+ is a unique floor heating control system for all heating and cooling applications – specially designed to reduce installation time. CF2+ offers advanced functionality for every need, e.g. four different thermostats, including the infrared floor sensor for optimal comfort, heatpump bypass function and more.

CF2+ system

Hardwired systems

The FH-Wx is a standard hardwired control system with a built-in pump relay, public thermostat and the possibility to select a wired floor sensor.

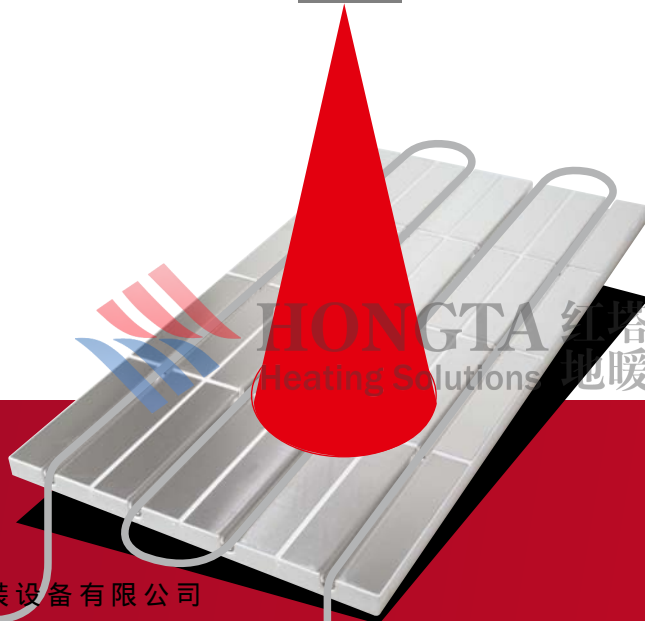

The BasicPlus (FH-CWx) is a stand-alone thermostat that is available in dial, display or programmable display versions and an optional floor sensor.

FH-Wx hardwired system

Enjoy the benefits of the CF2+ intelligent infrared floor sensor.

FH-CWx hardwired thermostats

The classic FHV

A well-proven solution for single room control with the original Danfoss thermostat.

PIPES

FOR ANY INSTALLATION

Floor heating pipes

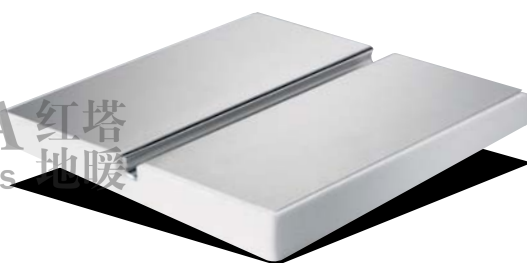

Danfoss FH pipes are available in both classic full-plastic and high-performance composite formats. Both types of pipe are multilayered and have an oxygen barrier. The PE-RT material ensures that the pipes remain flexible in all weather and working conditions.

SpeedUp™ heat panels

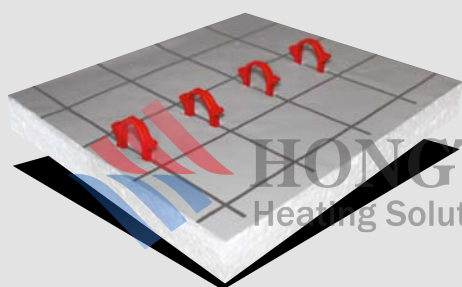

The SpeedUp™ system without screed is based on heat panels that offer superior and super fast response time – and an installation process that is more comfortable than ever. Simply lay the SpeedUp™ heating panels across the entire floor. The panels can be adjusted in size to fit even the tightest corners.

SpeedUp™ Heat Panels

BasicClip™

BasicRail™

BasicGrip™

Basic™ screed systems

Danfoss offers a sophisticated range of screed-based systems. Our three systems BasicGrip™, BasicClip™ and BasicRail™ are all ideally suited for new buildings and renovation projects.

All Basic™ systems are low-height screed systems that are easy and simple to install.

All Basic™ systems are made up of panels with an overlap function. This ensures that impact sound is minimized.

GET STARTED TRY OUR ONLINE TOOL

Our online QuickPlanner dimensioning program enables you to calculate the correct specifications for your floor heating project in just minutes. Enter a few basic details and QuickPlanner will give you all necessary information regarding system design, product selection and commissioning. This innovative tool provides invaluable support in both the tendering and implementation phases:

- Fast and accurate dimensioning of your floor heating system
- Create a “shopping list” using QuickPlanner as a product selection tool
- Create a system report with valve pre-settings and pressure loss
- Prepare for your job quickly and professionally using an online tool that is always available
